1. Introduction

JOB OPPORTUNITIES IN MO I RANA AND THE RANA REGION

In Mo i Rana and the Rana region there are more than 3,000 companies in fields such as manufacturing, engineering, construction, energy production, innovation and development, IT and technology, digitalisation, logistics, aquaculture, healthcare/hospitals, culture and travel.

In the past, the region primarily relied on traditional industries. Today the hallmark of the labour market is high skill levels and a variety of job opportunities. Given the low unemployment rate, there are numerous opportunities for those looking for work and career opportunities. We will do our best to help you find a job that suits your needs and wishes.

Skilled professionals are the key to innovation and competitiveness, to growth and employment, to prosperity and a good way of life. In Mo i Rana and the region, we will secure and expand our skills base, and we welcome you on that journey.

Ingvild Skogvold,
CEO of the Rana Region
Business Association

The Rana region has exciting and varied employment opportunities within both the private and public sectors. Our industry is at the forefront of developing green solutions for the circular economy and cutting greenhouse emissions. We have a thriving IT environment, with businesses and institutions that are constantly on the lookout for the brightest minds. Our research and development environment works closely with the business community. Rana is also a retail hub for the wider region, with shops, cafés, theatres, festivals and more. I hope we will have the pleasure of welcoming you to the Rana region.

“Skills have become the global currency of the 21st century. A key challenge for businesses in our region is to attract qualified labour. Thus, as Director of Rana Development Agency, I can ensure we will welcome and appreciate your skills and qualifications”.

Ole Kolstad,
CEO of Rana Development Agency

2. A summary of the labourmarket

Mo i Rana's differentiated business community provides good job opportunities for both men and women. Rana municipality pursues an active policy that facilitates social and business development that attracts people and companies alike. In 2019, the unemployment rate in the municipality was only 2.2 per cent. This indicates an optimistic business environment where both private and public employers recognise their staff as their key asset.

Mo Industrial Park is the leading industrial development zone in Northern Norway. One hundred and eight businesses are located in the park, ranging from recycled steel products to fish farming and district heating from the surplus heat of the industrial processes. In total, around 2,500 people work in the industry park, which is known for its ambitious goals relating to climate, sustainability and the circular economy. As Rana is rich in minerals, another important employer is the mining company Rana Gruber. The largest companies have daily links with the world market. In 2018, the companies at Mo Industrial Park had exports worth NOK 5.5 billion.

The municipality of Rana also has a strong public sector that provides good government services on behalf of the Norwegian state, with the whole of Norway as users, as well as regional and municipal services.

The largest hospital in Helgeland is situated here offering a broad range of health disciplines. The Mo i Rana branch of the National Library of Norway is internationally renowned for its digitalisation of cultural

heritage and collaborates with prestigious libraries and universities around the world. Mo i Rana has a flourishing IT environment: from Skatteetaten (the Norwegian Tax Administration), Statens innkrevingssentral (the Norwegian National Collection Agency) and Evry, producing and monitoring fraud prevention for all credit cards in Northern Europe, to TAG Sensors, producing temperature sensors with tracking for the food industry worldwide.

The city and the region have a range of international businesses, with significant exports of metals, iron ore and energy. The processing industry is an important pillar in the private sector. We are home to Northern Norway's leading industrial expertise in aquaculture and fish-processing, engineering and specialised manufacturing. We have industries based on knowledge and innovation, world-leading technology and natural resources. The people that work here thus play an important role in the creation of products that the world needs and demands.

Rana Development Agency (Rana Utvikling) is the municipality's business development agency, and is responsible for implementing the municipality's business plan.

The Agency facilitate new business activities and help to improve the framework conditions for businesses. Thus, the agency offer courses in business development and support for funding applications for both start-ups and established businesses. There is also a co-working space, Væxt, which is free for use by start-ups.

3. Short list of labour opportunities

3.1 Research and development

Campus Helgeland

Campus Helgeland is a collaborative hub for education and development, offering study programmes and courses from **Nord University** and **UiT The Arctic University of Norway** and housing a number of regional development actors such as Kunnskapsparken Helgeland, Rana Utvikling AS, Innovation Norway and Arctic Cluster Team. The campus hosts around 470 students from Nord University and 330 students from partner institutions.

It was established in 2013 and is one of Norway's newest campuses.

Among the study programmes here you will find pedagogy (five-year master's programme), nursing (bachelor's degree), engineering (bachelor's degree), finance and administration, and business development, as well as shorter programmes and single topics.

Photo: Fredrik Holmin

Website: campushelgeland.no

Sintef Helgeland

The company collaborates with companies in the region to give the Norwegian land-based industry green competitiveness.

SINTEF Helgeland aims to establish a robust and business-relevant technological research institute, based on the region's advantages. Strategic focus areas are the circular economy and sustainability, including the battery cell industry.

Are you a researcher interested in these subjects? Please check out the website:

SINTEF Helgeland - SINTEF

Sintef Norlab

SINTEF Norlab is Norway's largest Norwegian-owned laboratory company. The company has 13 locations, from Porsgrunn in the south to Glomfjord in the north and its headquarters in Mo i Rana.

The professions at Sintef Norlab include HSE engineers, chemists, laboratory technicians, CNC operators and civil engineers.

Website: sintefnorlab.no

Kunnskapsparken Helgeland

Kunnskapsparken Helgeland is a regional innovation company. The company works closely with academia, business and the public sector to develop and contribute to increased growth in Helgeland.

Its employees have varied backgrounds, in business development, tourism, engineering and research, for example.

Website: kph.no

3.2 Education

Mo i Rana offers a wide range of choices for education and career development. It hosts campuses for Nord University and UiT The Arctic University of Norway. Polarsirkelen High School has 1,150 students and a staff of about 300. The junior high school is Norway's largest and is situated in the town centre.

The school has recently been modernised and offers various optional language courses, such as Spanish, Russian, French and German. It is also possible to choose from several other extra subjects, including crafts, theatre, sports and more. In March 2021, the Science Centre of Nordland will open in town.

Polarsirkelen VGS

This high school is one of Nordland County's largest upper-secondary schools and is the school offering the most educational programmes in one school. It has around 1,150 students and 300 staff, distributed over 11 different study programmes.

Study preparation education programme: study specialisation, music, dance and drama, sports subjects, media and communication, art, design and architecture.

Vocational education programme: health and upbringing subjects, building and construction engineering, electrical subjects, engineering and industrial production, restaurant and food subjects.

Website: polarsirkelen.vgs.no

Rana Culture School

This school has 20 staff and over 400 pupils, most of whom take classes in music, visual arts and theatre. Staff provide instruction in the visual arts, theatre, musical theatre, musicals, bands, trumpet, cornet, trombone (brass), clarinet, saxophone, flute, violin, cello, double bass, vocals, piano, classical guitar, electric guitar, bass guitar, percussion and music theory. Students receive instruction either individually or in groups.

Website: Rana Culture School

Nordland Science Centre

This science centre offers a unique learning experience that can contribute to increased competence, recruitment and value creation.

The main theme of the science centre is Nordland's natural resources, technology, and digitalisation. Interactive exhibits and pedagogical teaching programmes have been selected according to these themes.

It will open in Q2 2021.

3.3 Financial services

The financial services comprise companies such as commercial banks, investment banks, non-banking financial institutions and accounting companies.

Sparebank 1 Helgeland

Sparebank 1 Helgeland is the official local bank for the Helgeland region and has its headquarters in Mo i Rana.

The bank is a competence company with varied and exciting work roles, including customer-related and external jobs such as

advisers on personal economy and corporate economics, investment and insurance. Sparebank 1 Helgeland can offer its employees good development opportunities, but at the same time it is small enough for the individual to be visible and able to have an influence.

Website: Privat | Helgeland Sparebank (hsb.no)

DNB (The Norwegian Bank)

DNB is Norway's largest financial services group, and one of the largest in the Nordic region in terms of market capitalisation. Furthermore, the bank is a world-leading shipping, offshore and aquaculture bank.

DNB has a branch in Mo i Rana with 15 employees. It offers financial services, loans, savings and advice on insurance, as well as pensions for customers.

Photo: Employees at DNB's office in Mo i Rana

Website: [Welcome to DNB - Norway's largest financial services group - DNB](#)

PwC, BDO and Helgeland Revisjon

- Auditing, consulting, and accounting

PricewaterhouseCoopers (PwC)

At PwC in Mo i Rana you will find one of the foremost large-scale competence environments in auditing, consulting, accounting and

legal services. The company helps public and private companies to achieve their goals and succeed.

Website: [PwC Norway](#)

BDO

BDO in Mo i Rana is a leading auditing and consulting company in Helgeland and in Norway as a whole. With a local presence and a good understanding of Norwegian business

and society, it assists a wide range of businesses. Its employees are mainly accountants, bookkeepers, business lawyers and advisers.

Website: [Mo i Rana \(bdo.no\)](#)

Helgeland Revisjon

Helgeland Revisjon (auditing) is a locally owned auditing and consulting company. Its skilled employees have many years of experience in auditing companies.

Website: [Helgeland Revisjon](#)

3.4 Industry

Industrial culture is deeply ingrained in the mindset of the people of Rana and has become a strong business advantage. The city has developed industrial competence that attracts skilled workers from all over the world and has recruitment agencies that are specialised in this area.

Mo Industrial Park

Today: Mo Industry Park is an infrastructure company that facilitates the leading industrial hub in Northern Norway and is among the biggest industrial clusters in Norway. The park is home to 108 companies (2,500 jobs) that in sum account for 7 billion Norwegian kroner in turnover (2016), of which 5.5 billion is export oriented. About 70 per cent of products from Mo Industrial Park end up in global markets. Celsa, Elkem and Ferroglobe

are a few of the largest companies located in the park.

The industrial park aims to become a world-class green industrial park. Its competitive advantages include access to large quantities of renewable energy and excellent access to water. In addition, the park has well-established infrastructure for logistics and data networks.

Website: [mip.no](#)

Celsa Armeringsstål

CELSA Armeringsstål is the Celsa Group's reinforcing steel producer in the Nordic region and is Norway's largest recycling company. Thanks to its use of hydroelectrical power as a basic energy resource, CELSA Armeringsstål has achieved a strong environmental profile.

» 700,000 tonnes of steel are recycled every year. That's compatible with two Eiffel Towers per week!

Professions: engineers (in computer science, electrics, HMS, chemistry, economics and the process industry), accountants, economists, environmental consultants, personnel consultants, IT consultants, logistics operators and sales employees

» Number of employees (2018): 340

» Operating income (2019):
NOK 2.9 billion

Website: [Official website of CELSA Nordic™](#) - Committed to the environment

News about Celsa Armeringsstål: [celsa armeringsstål](#) - Google Search

Elkem Rana AS

Elkem produces silicone, silicon, alloys for the foundry industry, carbon and micro silica. Headquartered in Oslo, the company's 31 production sites and extensive network of sales offices and agents around the world ensure proximity to customers and access to attractive end markets.

Its mission is to “contribute to a sustainable future by providing advanced silicon, silicone and carbon solutions, adding value to our stakeholders globally”. It is committed to staying at the forefront of technology,

advancing the production of silicon, silicone and carbon materials and creating innovative and green solutions and business models that promote a sustainable future.

» Elkem Rana has 109 employees.

» Its employees in Elkem have a variety of educational backgrounds, such as computer engineering, electrics, electrical engineering, HMS engineering, IT, industrial mechanics, industrial work, economics/accounting and so on.

[Website: Elkem Rana](#) | [Contact](#) | [Elkem.com](#)

[News about Elkem Rana: Elkem Rana - Google Search](#)

Rana Gruber

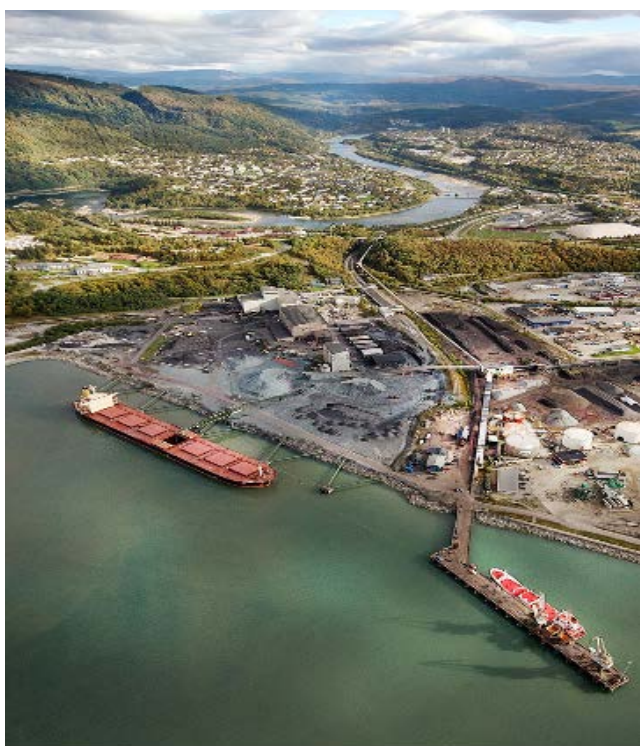

Rana Gruber AS is one of Norway's largest companies in mining and iron ore beneficiation and a key company in Nordland. Its products are based on local natural mineral resources, upgraded and tailored for applications, then exported to customers worldwide. Rana Gruber primarily serves steel producers and the chemical industry.

» Employees (2018): 304

» Operating Income (2019):
app. NOK 1 billion

» Professions: Rana Gruber offers a range of interesting positions in civil engineering and operation processes, mine work, mechanics and electrical services, laboratory, R&D and EHS.

Rana Gruber claims that its success is down to its employees' competence and commitment, and it greatly values its skilled and motivated employees.

Website: Work with us ([ranagruber.no](https://www.ranagruber.no))

Ferroglobe Mangan Norge AS

Ferroglobe is one of the world's largest producers of ferrous and silicon manganese. The company Ferroglobe Mangan Norge AS is located in Mo Industrial Park and produces manganese alloys in two smelting furnaces with a capacity of 120,000 tonnes a year.

Momek Group

MOMEK Group is a provider of a wide variety of services and products and operates in several markets, ranging from the process industry, contracting, mining, oil and gas and aquaculture to renewable energy and infrastructure.

Momek is located in four countries in Europe and has its headquarters in Mo i Rana.

It is important to MOMEK that its employees enjoy their work. This means providing a stable workplace and exciting and challenging work. It also promotes well-being, both physical and mental, through good agreements, insurance, events and activities.

» Number of employees in Mo i Rana: 450

» Revenue reached NOK 620 million in 2019

Website: [The Company](#) | [MOMEK Group](#)

Westcon Helgeland

Westcon Helgeland was established in 1987, and the yard comprises a large covered dry dock, extensive fabrication halls, and a proper deep-water quay. The business take care of ship repairs, fabrication of ship modules and subsea equipment for the oil and gas industry, as well as fabrication and maintenance work for the fish farming

industry. For instance, Westcon Helgeland has, among other things, delivered underwater constructions for Aker and Aibel, and is presently working to become prequalified for other interested customers.

They deliver tailor-made products in steel, stainless steel, and aluminium, according to the customer's drawings and specifications.

Website: [Facilities: Helgeland](#) | [Westcon Yards](#)

3.5 Fisheries & aquaculture

In Lurøy Municipality you can find a marine cluster: three locally owned fish-farming companies with their head offices and production facilities. They farm salmon along the coast of Helgeland, surrounded by cold fresh waters and wild and beautiful nature.

Nova Sea

Nova Sea AS is one of the largest producers of Atlantic farmed salmon in Northern Norway. It has 33.33 fully owned and 4 partially owned farming authorisations.

Check out Nova Sea's career site:

Talent Recruiter | by Talentech (hr-manager.net)

Lovundlaks

Lovundlaks is one of Norway's most productive salmon farmers. Over the last three years the company has invested around NOK 1 billion in growing the business and, as a result, it has experienced an increased demand for labour.

Kvarøy fish-farm

Kvarøy fish farm is at the forefront of sustainable fish farming. Its focus on environmentally friendly and sustainable farming has opened doors around the world for the small family business. The American chain Whole Foods, internationally known for its very strict producer requirements in terms of both product quality and sustainability, environment and animal welfare standards, buys most of the salmon for its 400 stores from Kvarøy.

Website: [Kvarøy Fiskeoppdrett](https://kvaroyfiskeoppdrett.no)

3.6 Construction

MBA

MBA is a versatile construction contractor in Mo i Rana. The company has solid expertise at all levels and long experience as both a total and a main contractor. It takes on assignments for both private and public clients.

Website: [MBA Entreprenør AS - Det er vi som bygger](#)

IMTAS

IMTAS is a service and production provider that serves local and regional industry. Its service and production spectrum includes mechanical services, CNC machining, industrial piping, certified welding, steel construction, refractory services, installation and engineering. Its main office and workshop are located in Mo Industrial Park. IMTAS is always looking for motivated employees.

Website: [Jobbe i IMTAS - IMTAS](#)

GLØR

Glør is a company specialised in steel and aluminium constructions for building and industry.

Website: [Glor](#)

Helgeland Betong

Helgeland Betong manufactures concrete elements and hole coverings for commercial buildings, industrial premises and apartment buildings. Its workforce consists of skilled professionals with broad experience in production, sales and project management. The company is a supplier and partner to contractors, architects and professional customers in the region.

Website: [Helgeland Betong - Betongelementer og Ferdigbetong i Nord-Norge](#)

3.7 Technology

Technology is a key driver of change, and improved digital skills will be vital in the future, both in higher-end dedicated ICT jobs and, more widely, as a basic core competence.

Tag Sensors

Tag Sensors is an up-and-coming technology company. Since 2012, we have developed barrier-breaking technology to track cargo and monitor its temperature in transport, regardless of the carrier or transportation method.

At TAG Sensors we are always looking for talented people to join our team. If you think this might be something for you, send an email to: recruit@tag-sensors.com The company is also looking for R&D Engineers, iOS Developers and Software Developers.

Website: TAG Sensors AS - Your partner in cold chain monitoring (tag-sensors.com)

Tieto Evry Card Services AS

TIETO EVRY CARD SERVICES is Norway's largest supplier of plastic cards and related products and services. The company delivers more than 14 million cards per year, which includes payment cards, membership cards, gift cards, travel cards and ID cards, and it also provides blocking services and bank

card monitoring. Tieto EVRY Card Services is located in Mo i Rana and has approx. 270 employees. The company is thus a leading player in digital services and software, with a local presence and global capabilities.

» Operating income (2019): NOK 489 million

Photo: Evry's office in Mo i Rana

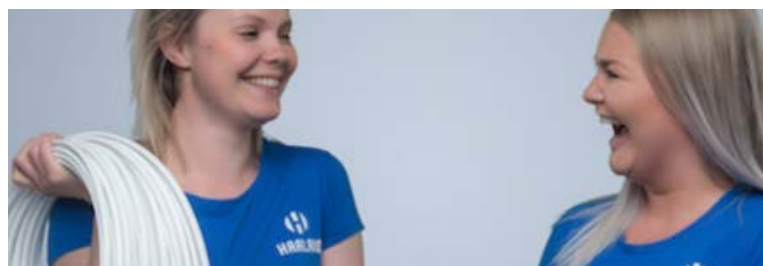

Website: Digital advantage for businesses and societies | TietoEVRY

Haaland AS

Haaland is a top provider of technical services. It offers services in electric installations, plumbing, ventilation, real estate, IT and telephony.

It emphasises professional service and good communication with customers in the corporate and private markets.

Haaland has an active recruitment strategy and each year it takes on a significant number of apprentices.

Website: [Elektriker-IT-VVS-Ventilasjon-Blikkenslager-Varme&Kjøl i Mo og Bodø \(haaland.no\)](http://Elektriker-IT-VVS-Ventilasjon-Blikkenslager-Varme&Kjøl%20i%20Mo%20og%20Bodø.haaland.no)

3.8 Public services

Rana Municipality

Rana Municipality, with its 2,200 employees, is the largest workplace in the municipality. In Norway, municipalities are required to administer and provide various services related to the following:

- » Kindergarten
- » Primary school
- » Health and welfare: for the elderly, the handicapped and others with nursing and care needs
- » City development and technical tasks
- » Social services such as child welfare and integration
- » Culture and sports: libraries, cultural schools, churches

» Administration, economy and politics: In administrative positions, case processing, consulting, development tasks and operations are carried out in various subject areas. Finance, law, personnel and ICT are important support functions.

The municipality thus offers a variety of positions.

Rana is a modern, exciting municipality with a high level of activity and aims to provide the best possible service in as many areas as possible to the city's population.

Website: [Våre ledige stillinger \(easycruit.com\)](http://Våre%20ledige%20stillinger.easycruit.com)

Rana Development Agency

Rana Development Agency is Rana Municipality's business agency, and its vision is to be the region's foremost resource for business development.

The company's most important job is to facilitate new business activities and help to improve conditions for business. Rana Municipality has a vision of growth in which Mo i Rana is an engine for regional growth and development, a vision that will be fulfilled through new establishments in and relocations to Helgeland.

The company will develop and secure existing businesses and welcome new ones, with an emphasis on long-term profitability. It offers free consultations as part of its start-up service, as well as assistance that contributes to growth and development for companies in the region.

Currently the agency is involved in several large projects, ranging from sustainable city development and large infrastructure projects to green industry (assisting FREYR) and tourism.

Website: [Hjem - Rana Utvikling \(ru.no\)](http://Hjem-Rana.Utvikling.ru.no)

The National Library

The National Library is located in both Oslo and Mo i Rana.

The National Library is one of the largest and most important cultural institutions in the country, and one of the foremost sources of knowledge of Norway and Norwegian conditions. It collects and acts as guardian for what is published in Norway within all types of media, includ-

ing books, magazines, newspapers, music, film, photography, broadcasting and online publications. Its main task is to preserve "the past for the future".

Hence, the institution presents itself as a modern library with both a physical and a digital presence.

» Number of employees in Mo i Rana: approximately 200

Website: [The National Library of Norway | Norwegian newspapers, books and other resources online \(nb.no\)](http://TheNationalLibraryofNorway.nb.no)

The National Collection Agency (Norwegian Tax Administration)

The Norwegian National Collection Agency (NCA) is an agency organised under the Norwegian Tax Administration. The NCA's task is to collect on various state claims. In total, the NCA has 35 clients in the government administration and collects on 188 different types of claims.

» The agency employs approximately 370 people in Mo i Rana. Main responsibilities: written and oral case processing and counselling, which includes contact with its users via telephone, letter and digital services. It also performs record keeping, mail processing, registration of requirements and document handling.

Website: [Statens innkrevingssentral \(sismo.no\)](https://sismo.no)

The Norwegian Welfare Administration (NAV)

NAV is the Norwegian public welfare agency, which consists of state labour and welfare services as well as municipal welfare agencies. It is responsible for a third of the state budget in Norway, administering programmes such as unemployment benefits, pensions, child benefits etc.

In Mo i Rana, NAV has two departments: NAV economic support and NAV service centre. In total, these departments have 235 employees: sociologists, social scientists, lawyers, humanists, economists, educators and others with a university or college background.

Photo: Employees outside the offices of the NCA and NAV

Website: [Information in English \(nav.no\)](https://nav.no)

The Norwegian Health Economics Administration (Helfo)

Helfo is the external agency of the Norwegian Directorate for Health and Social Affairs. Its responsibilities include making payments from the National Insurance scheme to healthcare providers, suppliers and service providers as well as individual refunds of expenses incurred by private individuals relating to medicines, dental care and health services abroad.

Helfo has offices in Mo i Rana.

Website: [About Helfo - Helfo](#)

3.9 Health

Helgeland Hospital

The hospital in Mo i Rana offers a polyclinic for surgery, orthopaedics, internal medicine, x-rays, gynaecology and maternal health services.

The hospital has approximately 500 employees.

In Mo i Rana, as well as in Norway in general, there is an increasing need for more health professionals. There is also a need for engineers, computer scientists, physicists and health educators.

Advertised positions: [Jobs - Helgelandssykehuset HF \(webcruiter.com\)](#)

Website: [Helgelandssykehuset Mo i Rana](#)

General Practitioners (GPs)

The GP is often the first health practitioner that users meet in the health service. The GP scheme was introduced in 2001 and gave everyone who lives in a Norwegian municipality the right to have a GP.

Mo i Rana is in need of more GPs, as well as more medical specialists at the hospital. Worthy of mention: In Norway, all GPs must have authorisation from the Norwegian Directorate of Health to work as a doctor.

3.10 Creative industries

Tanken Architecture

Tanken Architecture is an architecture agency located in Hemnes Municipality. Its office undertakes assignments for both public and private markets throughout Norway but has a geographical emphasis on Nordland. It has extensive experience in architecture, planning, interior design, and furniture and lighting design, and works on a wide range of projects with a focus on planning, designing and building good places to be and live.

Website: [Tanken arkitektur as](http://Tankenarkitektur.no)

Stein Hamre Architecture AS (SHAAS)

SHAAS, one of Northern Norway's largest architectural offices, is located in Mo i Rana and Lofoten. It has extensive experience and a strong professional foundation for taking on a wide range of roles, including architecture, landscape architecture, area planning, project management and consulting. It also prepares building applications and dispensation applications and can assist in applications to the Norwegian Labour Inspection Authority and other public bodies. SHAAS is always looking for skilled and committed employees, both new talents and employees with experience, who want to take part in their projects.
